

CSTech Global

Internal Knowledge Base & Policy Document

Official Resource Document

This document is highly confidential and intended solely for internal CSTech Global employees. It outlines core operational procedures, strategic AI integrations, and technical requirements across all departments including Procurement, Supply Chain, and Design.

1. Operational Guidelines

All employees must adhere to the data governance policies when interacting with the new ERP+AI systems. Ensure that no customer PII is transmitted through unauthorized AI endpoints.

2. Workflow Automation

Leveraging the Workflow Studio will reduce manual data entry by up to 60%. Please refer to the corresponding Department Labs for interactive tutorials on setting up your first automated agent.
